

## Services

Urgent need of **CAD drawing of one sector**, as prerequisite to launch several other activities.

Due to space restrictions and several constraints, study of a **full sector** is minimum.

Need is for:

- o **Define HV cable length**
  - awaiting to start prod. now
- o **Freeze final tubing gas + cooling**
  - for tender in September
- o **House safety items**
  - (inertion supply tubes; gap enclosures)
- o **Cooling scheme**
- o **Define cable length RPC-to-Link Box**
  - critical item
  - (may preclude housing of crates on periphery)
