

- ProdID 9776, 9777 (proc10)
  - Jobs stalled at BNL seems to be solved: what happened?
- Prod 9777 has still one merge TransID 105384 not done
- ProdID 9863
  - No updated status bis gb2\_prod\_summary/status
    - All counters ==0
  - Jobs have run (Checked via gb2\_job\_status)
    - All done at BNL, not at KEKCC
    - Just congestion at KEKCC or something else?
- Plan
  - Bucket8 is being calibrated now
    - Hopefully grid processing will start around B2GM
  - Test RAW->REC HLT\_hadron on grid
