

Data Processing Update

Data Production meeting
31/10/2019

Stefano Lacaprara
INFN Padova

Exp 10

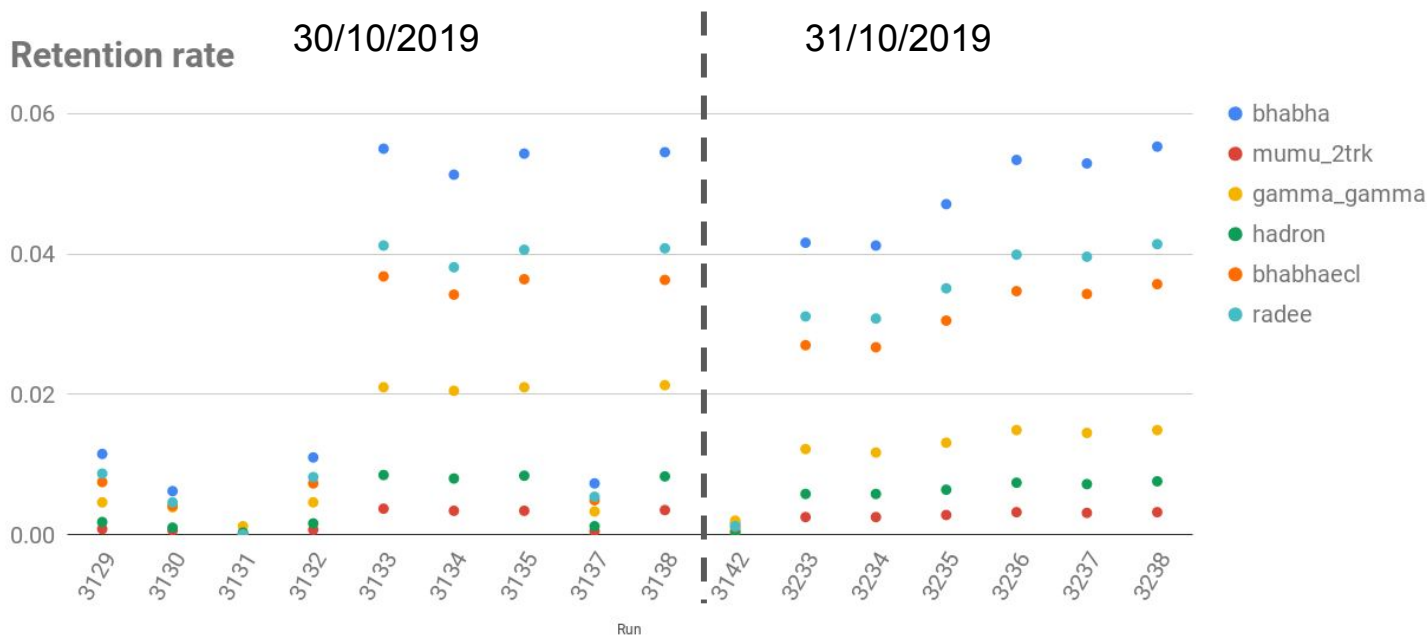

- So far: experiment 10
- TOTAL online: $L = 12.50 / \text{pb}$
 - 2.4 /pb yesterday (large background)
 - 10/pb w/o KLM tonight
 - **so mostly useless**

Prompt Raw HLT Skim

- Already in place and running
 - **mumu_2trk** , **bhabha**, **gamma_gamma**, **hadron**, **bhabhaecl**, **radee** (new)
 - GT = ['data_reprocessing_prompt_rel4_patchb', 'online']
 - Retention rate was initially bad, ~ok tonight

Unofficial Processing

- Started as well
 - Usual boilerplate: uncalibrated, untested, un-everythin, use at your own risk!
 - `GT = ['data_staging_calibration_prompt', 'data_reprocessing_prompt']`
 - cDST for all HLT skims (for the time being)

- Prompt HTL skim path:
 - `/group/belle2/dataproduct/Data/release-04-00-02/DB00000711/PromptSkim/e0010`
- Unofficial cdst path
 - `/group/belle2/dataproduct/Data/release-04-00-02/DB00000519/Unofficial/e0010`

Feedback is welcome!
